

7-1-7 Bottleneck Categorization and Longer-Term Planning activity

Scenario set #5

Instructions

In your group...

- Read through the following scenario.
- Review the '7-1-7 Bottleneck Categories' guidance.
- What bottleneck category is represented by the scenario below?
- On a flipchart or other designated area, please:
 - Identify longer-term action(s) to address the bottleneck
 - Brainstorm a plan for inclusion in national planning and/or funding opportunities
 - Brainstorm a plan for advocacy, as needed

Scenario

Zamunda is a large country with 15 provinces. Each province has a provincial public health department, though the ones closer to the capital are better equipped and staffed. The country did a retrospective review of 13 outbreaks, with nearly 100 bottlenecks. In each outbreak, they found consistent delays due to a lack of necessary supplies to transport specimens.
