

# 7-1-7 Bottleneck Categorization and Longer-Term Planning activity

## Scenario set #2

### Instructions

In your group...

- Read through the following scenario.
- Review the '7-1-7 Bottleneck Categories' guidance.
- What bottleneck category is represented by the scenario below?
- On a flipchart or other designated area, please:
  - Identify longer-term action(s) to address the bottleneck
  - Brainstorm a plan for inclusion in national planning and/or funding opportunities
  - Brainstorm a plan for advocacy, as needed

### Scenario

Alpharia just experienced a massive outbreak of measles across eight states. The outbreak prompted them to analyze their data. Prolonged power outages crippled the data collection and reporting systems, disrupting the flow of crucial health information. Without electricity, the transmission of disease surveillance data was conducted via informal couriers who used public transportation systems which, in rural areas, only ran a few times per week.
